

Reduction of Risk

NG&G's goal is to prevent Health & Safety incidents such as fires, explosions, injuries, illnesses and other accidents. We will utilize sound maintenance and work practices, safety-conscious design, employee training and incident investigations to minimize risks to our employees and the locations in which we operate. We will be prepared to respond promptly and professionally should an incident occur.

Safe Service

Through research, planning and analysis we will strive to minimize the health & safety hazards of our company and services. We will counsel our employees and affiliates in the safe handling of services and where feasible, attempt to correct unsafe conditions.

Resolution

We will promptly correct any conditions related to our service which result in a significant health or safety impact. We will take responsibility for any harm caused by our service to our customers' locations to the extent feasible.

We will inform appropriate officials, employees, affiliates and customers about significant health or safety hazards related to our service in a timely manner. We will regularly participate in dialogue with our affiliates to ensure adherence to these policies. No action will be taken against employees or affiliates for reporting dangerous incidents or conditions to management or appropriate authorities.

Management Commitment

We will ensure that the President, COO and senior management are fully informed about pertinent health & safety issues and take responsibility for carrying out health & safety policy. We will consider demonstrated health & safety experience as factors in our selection of future members of our organization.
